EDUCATION

SRM University, Kattankulathur
B.Tech, Computer Science and Engineering

2018 - 2022
CGPA: 7.99/10

PROJECTS

Movie Rating Website / — *Spring Boot, MySQL*

This website offers an engaging platform where users can interact with movies, manage their accounts, and personalize their profiles. Admins can add new movies, ensuring a dynamic and updated experience for everyone.

- Users can **rate** movies, **save favorites**, and explore posted content.
- Users can **create** accounts, **log in**, and perform **CRUD** operations on their profiles.
- Saved movies appear on **profiles** for quick and easy access
- **Admins** can **post** new movies to keep the platform fresh and engaging.

Social Media for Food Recipes / — *React.js, Express.js, MongoDB, GitLab*

An intuitive social platform interface that allows users to effortlessly create, share, and rate Food Recipes while fostering a vibrant online community.

- Users can **post**, **view** and, **like** recipes, recipes can be filtered through **search**, recipes also can be filtered based on whether they are veg or non-veg
- Users can perform Create, Read, Update, and Delete (CRUD) operations and securely log in to their accounts.
- **React Router DOM** for navigation, **Axios** for API requests, **Bcrypt** for password hashing, **React Slider** for dynamic content, and **CORS** for cross-origin sharing.

Portfolio Website / — *HTML, CSS*

A comprehensive website showcasing skills, education timeline, and expertise in HTML, CSS and UI/UX design.

- Utilizes CSS concepts like **positioning**, **animations**, **transitions**, **flexbox**, and **grid** to achieve responsive and dynamic layouts.
- The project effectively demonstrates advanced CSS techniques to create an engaging user experience.
- Reflects a strong understanding of modern web development principles and design aesthetics.
